GANIYU OLUWAPELUMI

Frontend & Shopify Developer | AI-Assisted Development

Lagos, Nigeria | 09063464922 | oluwapelumiganiyu1@gmail.com
Portfolio: https://sirpelzbuilds.netlify.app | GitHub: https://github.com/sirpels | LinkedIn: https://www.linkedin.com/in/oluwapelumi-solomon-6b77ab222

PROFESSIONAL SUMMARY

Frontend and Shopify Developer with hands-on experience building Shopify storefronts, responsive business websites and React applications.

I work with Shopify Liquid, HTML, CSS, JavaScript, React, Vite and Tailwind CSS. I use Git and GitHub for version control and deploy projects with Netlify and Vercel.

I also use AI tools to support research, planning, debugging and code review, while testing the final work and making sure I can explain the decisions I ship.

TECHNICAL SKILLS

Shopify & Ecommerce:
Shopify, Liquid, Online Store 2.0, theme customization, product and collection pages, storefront navigation, ecommerce UX, Shopify Sidekick

Frontend:
HTML5, CSS3, JavaScript, React, Vite, Tailwind CSS, Responsive Web Design

Tools & Workflow:
Git, GitHub, VS Code, Netlify, Vercel, browser testing, accessibility basics, AI-assisted development and code review

EXPERIENCE

FlyRank AI — Frontend AI Engineering Intern
2026 – Present

- Build, review and improve frontend features through practical engineering assignments.
- Work with React, Git/GitHub, deployment workflows, testing and modern frontend tools.
- Use AI coding tools for planning, implementation, debugging and review, then test the results and document important decisions.

Freelance Shopify & Frontend Developer
2024 – Present

- Customize Shopify storefront sections, product pages, collections and navigation using Liquid, HTML, CSS and JavaScript.
- Build responsive business websites and frontend interfaces for mobile and desktop.
- Test layouts, usability and links across different screen sizes and handle deployment and project updates.

SELECTED PROJECTS

ControlHQ — Shopify Storefront

Gaming-focused Shopify storefront where I worked on product presentation, navigation, responsive layouts and the overall ecommerce experience. I also used Shopify Sidekick as part of the development workflow.

Reelora — React Movie Discovery Application

React and Vite movie discovery application using the OMDb API and Firebase. Users can search for movies, view movie information and manage favorites and watchlists through a responsive interface.

Demotech Engineering — Business Website

Responsive website for an HVAC and mechanical engineering company. The site presents the company's services clearly and gives potential customers a clearer path to make enquiries and request quotations.

Drift Line — Custom Shopify Theme
In Development

Custom Shopify Online Store 2.0 theme built with Liquid, HTML, CSS, JavaScript and JSON templates. The project focuses on reusable Shopify theme sections, responsive ecommerce UX, accessibility and maintainable theme architecture.

EDUCATION

University of Lagos
B.A. Philosophy
Expected 2026

TRAINING

Tech Studio
Software Engineering Training Program

Completed a six-month practical software engineering training program focused on frontend development and project building.
