Lagos, Nigeria | 09063464922 | oluwapelumiganiyu1@gmail.com
sirpelzbuilds.netlify.app | github.com/sirpels | linkedin.com/in/oluwapelumi-solomon-6b77ab222

PROFESSIONAL SUMMARY

Frontend and Shopify Developer with hands-on experience building responsive business websites, React applications, Shopify storefronts, and custom ecommerce experiences. Skilled in Liquid, HTML, CSS, JavaScript, React, Vite, Tailwind CSS, Git/GitHub, responsive design, and browser testing. Uses AI-assisted development for research, planning, debugging, code review, and documentation while remaining responsible for technical decisions, testing, and final implementation.

TECHNICAL SKILLS

Shopify & Ecommerce: Shopify, Liquid, theme customization, Online Store 2.0, product and collection pages, storefront navigation, ecommerce UX, Shopify Sidekick.

Frontend: HTML5, CSS3, JavaScript, React, Vite, Tailwind CSS, responsive web design.

Development & Workflow: Git, GitHub, VS Code, Netlify, Vercel, browser testing, accessibility awareness, AI-assisted development and code review.

EXPERIENCE

FlyRank AI - Frontend AI Engineering Intern | 2026-Present

- Build, review, test, and deploy frontend features through practical engineering assignments using React, frontend tooling, Git/GitHub, and deployment workflows.
- Use AI coding tools for implementation, debugging, research, and documentation while verifying code and technical decisions.

Freelance Shopify & Frontend Developer | 2024-Present

- Customize Shopify storefronts, sections, layouts, and product experiences with Liquid, HTML, CSS, and JavaScript.
- Build responsive business websites and frontend applications, focusing on mobile usability, navigation, ecommerce presentation, and deployment.

SELECTED PROJECTS

ControlHQ - Shopify Storefront

Gaming-focused storefront work covering ecommerce presentation, responsive experience, navigation, and Shopify development, with Shopify Sidekick in the workflow.

Live: sirpelsbuilds.myshopify.com

Reelora - React Movie Discovery Application

Movie search, information, favorites, and watchlists in a responsive UI. Stack: React, Vite, Tailwind CSS, OMDb API, Firebase.

Live: reelora-six.vercel.app | Code: github.com/sirpels/Reelora
